3. Income taxes

Estimated taxable income for the period ended is \$nil. Based upon the level of historic taxable income it cannot be reasonably estimated at this time if its more likely than not the Company will realize the benefits from future income tax assets or the amounts owing from future income tax liabilities.

Consequently, the future recovery or losses arising from differences in tax values and accounting values have been reduced by an equivalent estimated taxable temporary difference valuation allowance.

The estimated taxable temporary difference valuation will be adjusted in the period that is determined that it is more likely than not that some portion or all of the future tax assets or future tax liabilities will be realized.

For further information on the Company's actual losses for tax purposes, please refer to the September 30, 2001 audited financial statements. The benefit of these losses and the loss for the period ended have not been recognized in these financial statements.

At December 31, 2001, the Company's income tax expense was nil. No benefit has been recognized in these financial statements.

The future income tax assets and liabilities that may result from differences in tax values and accounting values have not been reflected in these financial statements.
